ABOUT ME

Computer Science Engineering student with strong foundations in Data Structures, Algorithms, Object-Oriented Programming, and Backend Development. Experienced in designing REST APIs, relational databases, and scalable backend logic for web and mobile applications. Proficient in Python, also with the knowledge of Java, and SQL with hands-on experience building applications using Android, Node.js, and MySQL.

PROJECTS

KAVACH – WOMEN SAFETY MOBILE APPLICATION

Tech Stack: Android, Kotlin, Firebase Realtime Database, REST APIs, Google Maps API

Programming Languages: Kotlin

- Developed a women safety mobile application with SOS alerts, live location tracking, guardian emergency pin alerts, and offline SMS support.
- Added safe-place review features to help users view and share safety ratings for locations. Integrated Firebase for authentication, real-time data sync, notifications, and secure cloud storage.
- Designed fast-response workflows for emergency scenarios and reliable support in low-network conditions.

HEALTHIFY – FOOD RECOMMENDATION SYSTEM

Tech Stack: HTML, CSS, JavaScript, Node.js, MySQL, REST APIs

Programming Languages: JavaScript, SQL

- Developed a health-focused recommendation platform that analyzes user inputs and suggests personalized food plans.
- Created backend APIs for recommendation logic, chatbot interactions, and user data processing.
- Managed relational database design for storing profiles, health metrics, and recommendations.

Built Chess with AI using Python, implementing game logic and intelligent move generation, along with other academic and problem-solving software projects.

CERTIFICATIONS

AI and Digital Transformation in Government

UNESCO x University of Oxford Saïd Business School

May 2026

Developed expertise in AI governance, data governance, cybersecurity, & digital transformation frameworks. Applied principles of responsible AI, digital strategy, stakeholder management, and technology adoption. Explored real-world applications of AI, data-driven decision-making, cyber-resilience, and large-scale digital transformation initiatives.

Microsoft Azure Course – Building AI Solutions (Ongoing)

Learning Azure AI services, cloud deployment models, and AI solution architecture, including cognitive services and scalable deployment strategies.

TATA GenAI Powered Data Analytics Job Simulation – TATA by Forage

Completed practical tasks including exploratory data analysis, delinquency prediction using AI, and AI-driven collections strategy implementation.

Gemini Certified Student – Google

Demonstrated proficiency in using Google AI tools, including prompt engineering, generative AI workflows, and productivity applications.

Commvault Pratidhi 2025 – Gold Award

Recognized with Gold Award for outstanding technical performance and problem-solving excellence in a competitive environment.

EDUCATION

JSS SCIENCE AND TECHNOLOGY UNIVERSITY
BE | CSE

2022 – 2026

MPV PU COLLEGE
Pre – University

2020 – 2022

BVB MYSORE
10th grade

2019 – 2020

TECHNICAL SKILLS

Python

Kotlin

Rest APIs

Node.js

AI ANALYTICS

HTML,CSS, JS

Mysql

Git

Git Hub

VS code

Firebase

AI ANALYTICS

PREDICTIVE ANALYSIS

Linux

PROGRAMMES PARTICIPATED

TATA GROUP DATA ANALYTICS JOB SIMULATION ON FORAGE

- Completed a job simulation involving AI-powered data analytics and strategy development for the Financial Services team at Tata iQ.
- Conducted exploratory data analysis (EDA) using GenAI tools to assess data quality, identify risk indicators, and structure insights for predictive modeling.
- Proposed and justified an initial no-code predictive modeling framework to assess customer delinquency risk, leveraging GenAI for structured model logic and evaluation criteria.
- Designed an AI-driven collections strategy leveraging agentic AI and automation, incorporating ethical AI principles, regulatory compliance, and scalable implementation frameworks.

COMMVault PRATIDHI 2025 – MENTORSHIP PROGRAM

- Learned Software Development Lifecycle, System Design, and Cloud fundamentals while gaining exposure to enterprise-scale software engineering practices.
- Received Gold Award for outstanding technical performance during the mentorship program.

AI/ML INTERN – LEARNFIN (AICTE APPROVED)

- Built supervised and unsupervised machine learning models using Python with data preprocessing and feature engineering. Evaluated models and optimized workflows to improve performance and accuracy.
-
